## Green Infrastructure Autumn 2024 Intern Needed

Nanticoke Watershed Alliance (NWA) is a nonprofit that operates within the Nanticoke River watershed. NWA is currently seeking one Green Infrastructure Intern to join the team in autumn 2024. The autumn intern will work on average two days or 14 hours per week. Most work will take place on Wednesdays and Fridays.

GI Interns will mostly work in the Delaware portion of the Nanticoke River watershed. Work locations will vary and may include Laurel, Seaford, Bethel, Bridgeville, and Greenwood, DE, as well as Cambridge, MD. GI Interns will work 100% outdoors and must be comfortable working in varying weather conditions and lifting up to 50 pounds. Work will begin on September 4 and will continue until autumn projects have been completed, which is typically mid-November.

GI Interns should be prepared to:

- Actively maintain green infrastructure projects by weeding, watering, and mulching,
- Follow verbal and written instructions,
- Read and follow stormwater and planting plans,
- Interact with municipal employees, town residents, residential clients, and NWA staff and volunteers in a pleasant, cooperative manner,
- Plant herbaceous perennials, shrubs, and trees according to best management practices,
- Remove invasive plant species,
- Remove trash from GI installations,
- Maintain provided tool kits, and
- Complete other tasks as assigned.

GI Interns must have reliable transportation and a current, valid driver's license. GI Interns must be at least 18 years of age. Further, GI Interns are expected to be professional and courteous while at project sites. While prior experience in gardening and knowledge about native and invasive plants are helpful, no prior experience is required. Successful candidates will undergo an orientation prior to field work, as well as in-the-field training at municipal work sites, and must be able to communicate effectively with NWA staff, municipal employees, and community members.

GI Interns will earn \$15 per hour as contractual employees. GI Interns will also qualify for mileage reimbursement, as interns must use personal vehicles for work. All necessary tools will be provided.

**To apply for this position, please send a cover letter, a resume, and three references to Beth Wasden at [BethWasden@NanticokeRiver.org](mailto:BethWasden@NanticokeRiver.org) by August 9. When applying, please indicate that you are applying for a Green Infrastructure Internship.**
